

Here are the extracted activity details for the requested exercise:

Self-Study Drag-and-Drop Activity 1.1: The AI Business Model [10 minutes]

Learning Outcome Addressed

- Identify the stages of the AI design process model.

(Note: This is a self-study activity and does not count toward the completion of the program.)

Context

Now that you've learned about the four stages of the AI business model, you will test your knowledge by defining the four stages, each of which is necessary to establish the requirements and specifications of a functional AI product.

Task

The diagram illustrates the structure of the AI design process with four blank labels:

- **Stage One**
- **Stage Two**
- **Stage Three**
- **Stage Four**

Drag the correct description to each stage in the diagram:

- *Tinkering (creation)*
 - *Define a business process that incorporates this behavior*
 - *Develop an AI approach*
 - *Identify a behavior that AI can do*
-

Submission Instructions

- **Average Completion Time:** 10 minutes
