01 Introductions

01 INTRODUCTIONS: Faculty

Brian Subirana

Director, MIT Auto-ID Labs
Director, MIT and Accenture Convergence
Initiative for Industry and Technology

Duane Boning

Professor of Electrical Engineering
and Computer Science,
EECS Department, MIT

Stefanie Mueller

Associate Professor,
EECS Department, MIT

Thomas W. Malone

Patrick J. McGovern Professor of Management;
Founding Director, MIT Center for Collective
Intelligence

Andrew Lippman

Associate Director, MIT Media Lab;
Co-principal Investigator, MIT Communications
Futures Program

Bruce Lawler

Managing Director, MIT Machine
Intelligence for Manufacturing and
Operations

01 INTRODUCTIONS: Learning Facilitator

02 Learning Journey

02 LEARNING JOURNEY: Outcomes

This course will help you to:

- Compare and contrast the stages and components of the AI design process model
- Analyze and categorize different machine learning algorithms in the given scenarios
- Analyze and categorize different convolutional/deep/recurrent neural network algorithms in the given scenarios
- Apply the four stages of the AI Design Process Model to solve a health-related technical problem
- Define human–computer interaction and explore the frontier for developing such interactions
- Identify and compare the five basic types of superminds and how they address various functions and problems
- Predict AI opportunities in the media for commerce, as the society transforms from enabling analog to digital business processes
- Analyze the steps to build a business case through assessing the needs of stakeholders, mapping the process, cost modeling, assessing technical readiness, prioritizing opportunities, and asking key questions

02 LEARNING JOURNEY: Overview

Module #	Title
Orientation	Program Orientation and Pre-Program Learner Expectations
Module 1	Introduction to the Artificial Intelligence (AI) Design Process
Module 2	Artificial Intelligence Technology Fundamentals: Machine Learning
Module 3	Artificial Intelligence Technology Fundamentals — Deep Learning
Module 4	Designing Artificial Machines to Solve Problems: Deep Learning
Module 5	Generative AI
Module 6	Designing Intelligent Human-Computer Interfaces
Module 7	Superminds — Designing Organizations That Combine Artificial and Human Intelligence
Module 8	Marketplace Frontiers of AI Design: Research
Module 9	Marketplace Frontiers of AI Design: Practice

Course Details

- This course has 9 modules
- Modules release on a weekly basis
 - Each week, on **Thursday**, you will receive new material
- Office Hours: 1 hour per week per Learning Facilitator

02 LEARNING JOURNEY: Activities

	 Workbooks	 Discussions: Q&A and Topic	 Self-Study Activities	 Jupyter Notebooks
Objective	Apply the concepts learned in the course to your organization or one you intend to create and create actionable next steps	Encourage exploration, critical thinking and interaction with peers. Q&A: general about module; Topic: specific about a topic	Practice and assess understanding of the content learned during the week in different ways: quizzes, drag-drop activities, polls, etc.	Become familiar with the practical implementation of using Python.
Number	5 Modules 1, 6, 7, 8 & 9	Q&A: 9, one per week Topic: several	Several per week	11 Modules 2, 3, 4, 8
Completion Requirements	All Workbooks are required to pass this course	Not graded. Optional.	Not graded. Optional.	Not graded. Optional.
Notes	Learning Facilitators will give feedback to Workbook 9, Capstone Project, submissions made on time	NA	Self-study activities will come in the form of quizzes, drag-drop activities, polls, crowdsource etc.	JN use autograder EMCode

02

LEARNING JOURNEY: Activities Calendar & Completion Requirements

**Complete &
submit all 5
workbooks**

Week	Workbook Activity Title
Week 1	Business and Technical Requirements for AI
Week 6	Designing an HCI Interface
Week 7	Creating and Organizing with Superminds
Week 8	The Sustainability, Feasibility, and Responsibility of GANs
Week 9	Capstone Project

- Due Dates: activities are due 7 days after they are released, except otherwise specified.
- Extensions can be requested via Support tab and will be granted until course end date
- Learning Facilitators will give feedback Workbook 9, Capstone Project submissions made before the deadline. **Late submissions will not receive feedback.**

02 LEARNING JOURNEY: Optional Activities – Jupyter Notebooks

- The course has several Jupyter Notebook optional activities to give you the opportunity to become familiar with the practical implementation of using Python
- Jupyter Notebooks are hosted on an autograder called EMMCode
- There are some useful tutorials that participants should take a look at in they are interested in diving in the Jupyter Notebook Activities
- A possible solution for each Jupyter Notebook Activity will be released in PDF format
- You can ask LFs questions about these optional activities

Notebook Examples

Training vs. Testing Sets

Bayesian Inference

Logistic Regression vs. SVMs

K-Means in Python

Run a Single-Layer Perceptron in Python

Explore the Implementation of Autoencoders in Python

Explore the Implementation of CNNs in Python

Explore the Implementation of RNNs in Python

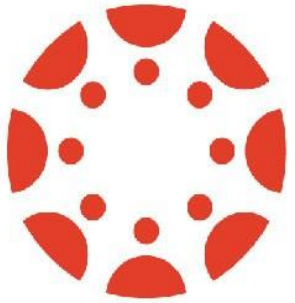

GANs in Slanted Land

02 LEARNING JOURNEY: Office Hours

- Learning Facilitator will host weekly Office Hours
- During Office Hours, learning facilitators will:
 - Answer live questions
 - Review content of the week
 - Provide examples
 - Go over how to complete assignments
- Attendance is not compulsory, but highly encouraged
- Office Hours are recorded and posted on Canvas
- Use <https://www.worldtimebuddy.com/> to convert UTC time to your timezone

Introduction to the Learning Platform

All program material can be found in the 'Modules' tab.

All videos and live sessions (and recordings) will be available to you directly within the learning platform.

The screenshot shows the 'AI Design' Course Dashboard. The left sidebar contains a list of navigation items: Home, Course Dashboard, Announcements, Live Sessions, **Modules** (highlighted with a red box and a red arrow), People, Grades, Assignment Extension, Classmates, Support, and Notification Settings. The main content area features a 'Webinar Reminder: Introduction Webinar' notification, a progress bar with tabs for Prepare, Orientation, and Weeks 1 through 6, a 'Hello Victor' welcome message, and a 'Prepare for Your Journey' section with four tasks: Review the Program Introduction, Update your Profile, Set up your Time Zone, and Synchronize Program Calendar to Your Personal Calendar.

Canvas: Classmates

What is it?

My Profile:

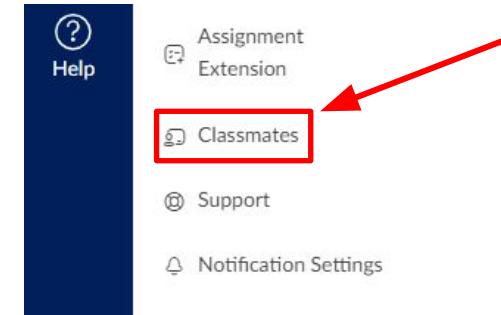

- Share more information about you and your work experience with your classmates
- Work on building your professional profile

Classmates:

- Build your network and community based on your experiences and location

What do I need to do?

1. Look for My Profile & Classmates on the left side menu of Canvas Homepage
2. Fill in the details on My Profile
3. Classmates will get populated!

Grading

Click “Grades” to see graded assignments.

- It is recommended that you complete all assignments by their posted due date. Assignments coincide with the learning content each week and you will receive the most value from completing them on time.
- Late Submissions – Please note, if you see “status” marked as **late** you will not be penalized. Pending on the submission, you simply may not receive an updated mark until a later date, in the event it is submitted late.

Knowledge base

Completion Requirements, Badges and Certificates

Will I get a certificate for this program?
What are the requirements to earn a certificate of completion?
How much time should I expect to spend on this course?

Withdrawals and Deferrals

Can I withdraw from the course and receive a refund or credit toward a future class?

Live Sessions (Webinars and Office Hours)

What is UTC?

Course Access and Technical Support

What are the browser requirements & security settings?
How can I get technical support?
How long do I have access to the videos and the course materials?

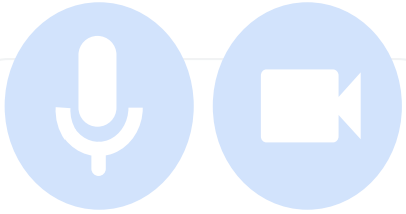

Are Emeritus diploma programs accredited?
What is an exemplary assignment badge? How does it work?

Is webinar attendance mandatory?

What devices can I use to access the course?
Why can't I download the course videos?

04 RECOMMENDATIONS

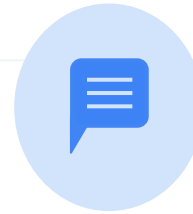

Make the most of the course and enjoy!

Attend Office Hours
with Learning
Facilitator and be
participative

Complete the course
activities to have a full
understanding of how
to Design AI

Participate in Q&A
Discussion Boards: ask
questions if something is
not clear and collaborate
with your other learners

Complete Weekly
Feedback Surveys and
provide us your
insights. They will help
us improve!

AI Note Taking

MIT does not allow the use of AI note-taking bots during live sessions for IP protection. Please be aware that if an AI bot is detected, we will remove it. As a reminder, all live sessions are recorded and posted on the learning platform. If you cannot attend a session live, you will be able to watch the recording. Thank you for your understanding.
