01 INTRODUCTIONS: Participants

02 Learning Journey

02 LEARNING JOURNEY: Outcomes

This course will help you to:

- Compare and contrast the stages and components of the AI design process model
- Analyze and categorize different machine learning algorithms in the given scenarios
- Analyze and categorize different convolutional/deep/recurrent neural network algorithms in the given scenarios
- Apply the four stages of the AI Design Process Model to solve a health-related technical problem
- Define human–computer interaction and explore the frontier for developing such interactions
- Identify and compare the five basic types of superminds and how they address various functions and problems
- Predict AI opportunities in the media for commerce, as the society transforms from enabling analog to digital business processes
- Analyze the steps to build a business case through assessing the needs of stakeholders, mapping the process, cost modeling, assessing technical readiness, prioritizing opportunities, and asking key questions

02 LEARNING JOURNEY: Overview

Module #	Title
Orientation	Orientation Week
Module 1	Introduction to the Artificial Intelligence Design Process
Module 2	Artificial Intelligence Technology Fundamentals: Machine Learning
Module 3	Artificial Intelligence Technology Fundamentals: Deep Learning
Module 4	Designing Artificial Machines to Solve Problems: Deep Learning
Module 5	Generative AI
Module 6	Designing Intelligent Human-Computer Interfaces
Module 7	Superminds — Designing Organizations That Combine Artificial and Human Intelligence
Module 8	Marketplace Frontiers of AI Design: Research
Module 9	Marketplace Frontiers of AI Design: Practice

Course Details

- This course has 9 modules
- Modules release on a weekly basis
 - Each week, on **Thursday**, you will receive new material
- Office Hours: 1 hour per week
(1 per Learning Facilitator)

02 LEARNING JOURNEY: Activities

	 Workbooks	 Discussions: Q&A and Topic	 Self-Study Activities	 Jupyter Notebooks
Objective	Apply the concepts learned in the course to your organization or one you intend to create and create actionable next steps	Encourage exploration, critical thinking and interaction with peers. Q&A: general about module; Topic: specific about a topic	Practice and assess understanding of the content learned during the week in different ways: quizzes, drag-drop activities, polls, etc.	Become familiar with the practical implementation of using Python.
Number	5 Modules 1, 6, 7, 8, 9	Q&A: 9, one per week Topic: several	Several per week	10 Modules 2, 3, 5, 8
Completion Requirements	All Workbooks are required to pass this course	Not graded. Optional.	Not graded. Optional.	Not graded. Optional.
Notes	Learning Facilitators will give feedback to Workbook 9, Capstone Project, submissions made on time	NA	Self-study activities will come in the form of quizzes, drag-drop activities, polls, crowdsource, etc.	Assignments use autograder EMCode

02

LEARNING JOURNEY: Activities Calendar & Completion Requirements

**Complete &
submit all 5
workbooks**

Week	Workbook Activity Title	Due Date
Week 1	Business and Technical Requirements for AI	September 3, 2026
Week 6	Designing an HCI Interface	October 8, 2026
Week 7	Creating an Organization with Superminds in Mind	October 15, 2026
Week 8	The Sustainability, Feasibility, and Responsibility of GANs	October 22, 2026
Week 9	Capstone Project	October 29, 2026

- Due Dates: activities are due 7 days after they are released, except otherwise specified.
- Extensions can be requested via the Assignment Extension or Support tabs and will be granted until course end date
- Learning Facilitators will give feedback for Workbook 9: Capstone Project submissions made before the deadline. **Late submissions will not receive feedback.**

02 LEARNING JOURNEY: Optional Activities – Jupyter Notebooks

- The course has several Jupyter Notebook optional activities to give you the opportunity to become familiar with the practical implementation of using Python
- Jupyter Notebooks are hosted and autograded on EMMCode
- There are some useful tutorials that participants should take a look at in they are interested in diving in the Jupyter Notebook Activities
- A possible solution for each Jupyter Notebook Activity will be released in PDF format
- You can ask LFs questions about these optional activities

Jupyter Notebook 2.1	Training vs. Testing Sets
Jupyter Notebook 2.2	Bayesian Inference
Jupyter Notebook 2.3	Regression vs. Logistic Regression
Jupyter Notebook 2.4	Unsupervised Machine Learning
Jupyter Notebook 3.1	Run Single-Layer & Multi Layer Perceptrons in Python
Jupyter Notebook 3.2	Explore the Implementation of Autoencoders in Python
Jupyter Notebook 3.3	Explore the Implementation of CNNs in Python
Jupyter Notebook 3.4	Explore the Implementation of RNNs in Python
Jupyter Notebook 4.1	Solving Healthcare Problems
Jupyter Notebook 5.1	Extracting Tokens
Jupyter Notebook 8.1	GANs in Slanted Land

02 LEARNING JOURNEY: Special recognition for your excellent work

The Grading Team will be awarding badges recognizing exemplary work on selected assignments and activities in this program. We encourage you to share your badges on your professional social media to be recognized for your achievement.

- Only on-time submissions will be considered.
- Badges will be awarded for work that exceeds the requirements of the assignment or activity.
- There is no maximum number of badges to be awarded.
- Badges have no bearing on the completion requirements. No extra points will be awarded or deducted.

Badges will be awarded for:

Assignment #	Topic
Required Workbook 7.1	Creating an Organization With Superminds in Mind
Required Workbook 8.1	The Sustainability, Feasibility, and Responsibility of GANs
Required Workbook 9.1	Capstone Project

02 LEARNING JOURNEY: Office Hours

Amanda Fetch

Wednesdays
5 PM UTC / 1 PM ET (US)

- Learning Facilitator will host weekly Office Hours
- During Office Hours they will
 - Answer questions live
 - Review content of the week
 - Provide examples
 - Go over how to complete assignments
- Attendance is not mandatory, but highly encouraged
- Office Hours are recorded and posted on Canvas
- Use <https://www.worldtimebuddy.com/> to convert UTC time to your timezone

Introduction to the Learning Platform

The screenshot displays the MIT xPRO learning platform interface. A sidebar on the left contains navigation links: Home, Course Dashboard, Announcements, Live Sessions, Modules, People, Grades, Assignment Extension, Classmates, Support, and Notification Settings. The main content area features a top navigation bar with tabs for Prepare, Orientation, and Weeks 1 through 6. A red box highlights a 'Webinar Reminder: Introduction Webinar' announcement, with an arrow pointing to a 'Latest Announcement' box. Below the navigation bar is a dark blue welcome banner with the text 'Hello' and 'Welcome to the'. A red box highlights the 'Prepare for Your Journey' section, which lists four tasks: 'Review the Program Introduction', 'Update your Profile', 'Set up your Time Zone', and 'Synchronize Program Calendar to Your Personal Calendar'. An arrow points from this section to a text box explaining the purpose of the welcome page. At the bottom, a 'Key Dates' section shows 'Program Start Date' (April 11, 2024) and 'Program Access' (April 10, 2025). An arrow points from this section to a text box explaining the importance of marking key dates.

Hello
Welcome to the

Prepare for Your Journey

- Review the Program Introduction
- Update your Profile
Take the first step towards building your network by updating your profile.
- Set up your Time Zone
Set your time zone so that all the dates appear in your local time zone throughout Canvas.
- Synchronize Program Calendar to Your Personal Calendar
Follow instructions to stay up-to-date with the Program schedule.

Visit the course welcome page featuring a welcoming message from the faculty, configure profile and time zone, and sync the calendar feed with personal calendar.

Key Dates

APR 11 2024	Program Start Date Please check back here on the start date to begin your Program orientation
APR 10 2025	Program Access You will be able to access the Program material on the learning platform until Apr 10, 2025 4:00 PM EDT

Mark the key program dates like the start date etc.

03

Personalized Course Dashboard

The screenshot shows a course dashboard with a sidebar on the left containing links: Home, Course Dashboard, Modules, My Grades, People, Announcements, Notification Settings, and Support. The main content area is titled 'Module 1:' and shows a progress bar with a green segment. Below the progress bar is a table titled 'ACTIVITIES REQUIRED FOR CERTIFICATE' with columns for activity name and due date. The table lists three 'Required Activity 1.1: Knowledge Check' items, all due on 'Jan 5, by 4:29am UTC'. The first item has a checkmark icon, while the others have exclamation mark icons. Below the table is a 'Live Sessions' section showing an event on 'OCT 12' titled 'Program details discussion Event' at '2:30 PM UTC' with a 'Join Here' button. A red box highlights the 'Announcements' link in the sidebar and the 'All Announcements' text below it. Another red box highlights the 'ACTIVITIES REQUIRED FOR CERTIFICATE' table. A red arrow points from the table to the text 'View activities required for certificate, serves as a helpful reminder and encourages timely completion of these essential tasks'. A third red arrow points from the 'Join Here' button to the text 'View and join events corresponding to orientation phase.'

Module 1: Feedback Survey

ⓘ This is a preview of the published version of the quiz

Started: Oct 2 at 7:45pm

Quiz Instructions

You have reached the end of Module 1.

Please take two minutes to share your feedback so we can improve your learning experience.

© Kellogg School of Management | Northwestern University. All rights reserved.

Question 1

In terms of learning, how effective was this module?

- ☐ Very effective
- ☐ Somewhat effective
- ☐ Neutral

Share your feedback weekly on Canvas for each Module - we monitor this for course adjustments

03 Modules and Live Sessions

All videos and live sessions (and recordings) will be available to you directly within the learning platform.

All program material can be found in the 'Modules' tab.

The screenshot shows the MIT xPRO Course Dashboard interface. On the left is a sidebar menu with the following items: Home, Course Dashboard, Announcements, Live Sessions, Modules, People, Grades, Assignment Extension, Classmates, Support, and Notification Settings. The 'Live Sessions' and 'Modules' items are highlighted with red boxes, and red arrows point from the text boxes on the left to these items. The main content area at the top right shows a 'Webinar Reminder: Introduction Webinar' for April 15, 2024, with a 'Prepare' button and tabs for Orientation, Week 1 through Week 6. Below this is a 'Hello' greeting and a 'Prepare for Your Journey' section with four tasks: Review the Program Introduction, Update your Profile, Set up your Time Zone, and Synchronize Program Calendar to Your Personal Calendar.

03 Accessing course calendar

You can access 'Course Calendar' by opening the 'Calendar' from the global navigation tab, and then selecting your course name.

The screenshot displays the Canvas Course Calendar interface. At the top, there are navigation tabs for 'Today', '←', 'March 2024', '→', 'Week', 'Month', 'Agenda', and a '+' icon. The main calendar grid shows days of the week (SUN to SAT) and dates. A red box highlights the 'Calendar Feed' link in the sidebar, and a red arrow points from it to a 'Calendar Feed' pop-up dialog box. The dialog box contains the following text:

Calendar Feed

Copy the link below and paste it into any calendar app that takes iCal feeds (Google Calendar, iCal, Outlook, etc.)

https://classroom.emeritus.org/feeds/calendars/user_wZwb

Click to view Calendar Feed

To sync your Canvas calendar with your mail calendar, click on 'Calendar Feed' and follow the steps as shown in the pop-up dialogue box.

Crowdsource Activity 7.1:	Locked	—	
Assignment 8.3:	Locked	—	

As you progress as per the course schedule, they see a summary status as 'On-track' along with clear breakdown of:

1. Earned points
2. Available points
3. Locked points

Different assignment submission statuses:

1. Locked
2. Pending Review
3. Graded
4. Upcoming Due
5. Missing

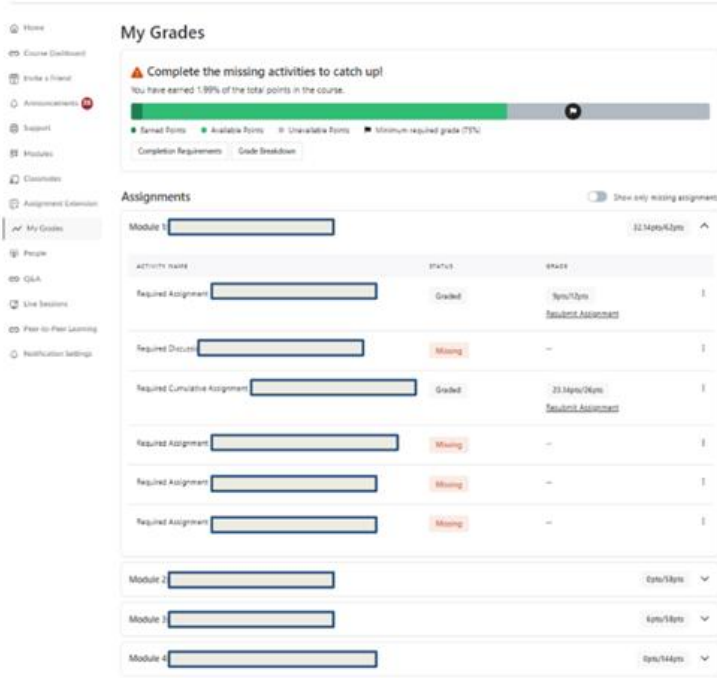

Before the first assignment is released, view all the graded activities in the course.

 MIT xPRO

03

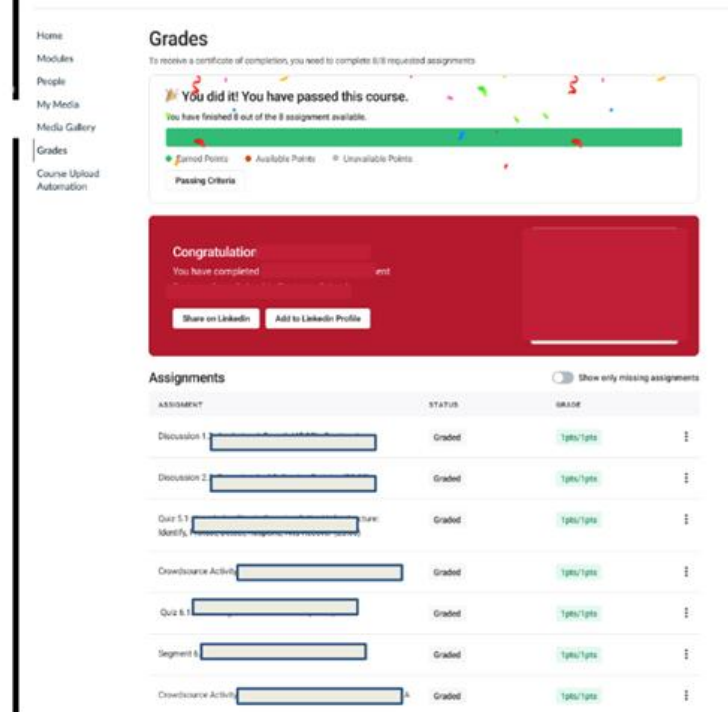

Gradebook Overview

Learner is behind:
Earned points < Passing % * points reviewed

If a learner falls behind, they will be able to see their overall progress as 'Falling Behind' and also see Missing/Overdue assignments. Learners can easily filter for Missing assignments to focus on to get back on track!

Learner passed the course:
Earned points >= passing criteria

Learners will be notified if they have passed the course as soon as their passing status becomes available

03 Gradebook Overview

Track your assignment submission and grading history and view grade breakdown for complex weighted assignment groups

The left screenshot shows the 'My Grades' page with a 'Submission Timeline' modal open. The modal displays the activity 'Required Assignment 1.1: Use HTML Tags (3 hours)' with a submission history table.

DATE	ACTION
Jul 10, 2024 4:09 PM UTC	Graded 9pts/12pts
Jul 10, 2024 4:09 PM UTC	Activity Submitted

The right screenshot shows the 'My Grades' page with a 'Grade Breakdown' modal open. The modal displays the formula $\frac{\text{Earned points}}{\text{Available points}} \times \text{Proportional weighting}$ and a table of activities.

Activities Categories	Earned Points	Total Points	Weight	Weighted Grade
Capstone Projects	0	0	35%	0%
Assignments (including Cumulative Assignments)	38.14	670	35%	1.99%
Discussions and Knowledge Checks	0	19	30%	0%

Total: 1.99%

Score a minimum final grade of 75% to receive a certificate of completion

03

Introducing Emeritus AI: designed to assist you throughout your learning journey

The screenshot shows the Emeritus dashboard. On the left is a sidebar with icons for Account, Dashboard, Courses, Calendar, Inbox, and Help. The main content area is titled 'Course Overview' and contains text about design thinking and a table of modules.

Course Overview

In a world that grows more complex and intensely connected each day, strategy and design thinking are no longer just the playground of design-focused companies. Organizations of every type and industry can (and must) use core design principles and applied creativity to develop innovative strategies that better connect them with their end users.

According to the IBM 2017 Global C-suite Study, "Organizations of all sizes are prioritizing personalized customer experiences. The enterprises that most effectively deliver on this imperative are using design thinking to manage complexity, orchestrate across channels and truly understand their customers' motivations."

To this end, organizations have three critical tasks: filling the funnel with a flow of creative ideas, validating those ideas and prioritizing the best ones, and shepherding them from seed stage to market.

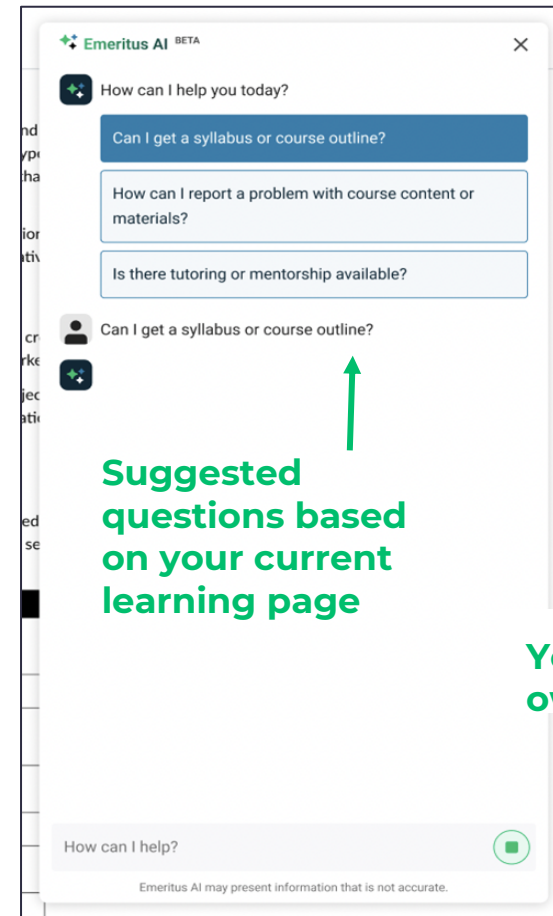

Design Thinking will provide participants the tools they need to take a design project from inspiration and insights to ideation and implementation, and understand the full scope of organizational innovation and strategy.

Modules

The program is structured around six modules. During this time, you will be exposed to a range of methodologies done through video lectures where you'll develop your own innovative product or service idea, and applications within your own company.

Module and Topic	Key Activities
Course Orientation	- Creation of your Profile - Technology Testing
Module 1	Design Thinking Skills
Module 2	Identifying Customer Needs
Module 3	Applied Creativity
Module 4	Design of Services
Module 5	Financial Analysis

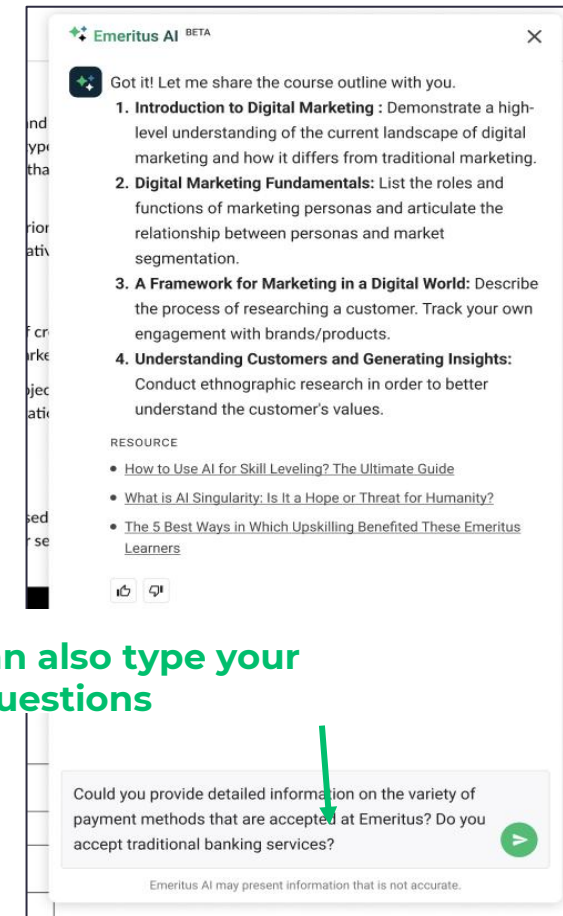

Emeritus AI

The screenshot shows the Emeritus AI chat interface. It displays a list of suggested questions based on the user's current learning page. A green arrow points to the first question, 'Can I get a syllabus or course outline?'.

Suggested questions based on your current learning page

- How can I help you today?
- Can I get a syllabus or course outline?
- How can I report a problem with course content or materials?
- Is there tutoring or mentorship available?
- Can I get a syllabus or course outline?

The screenshot shows the Emeritus AI chat interface. It displays a typed question: 'Could you provide detailed information on the variety of payment methods that are accepted at Emeritus? Do you accept traditional banking services?'. A green arrow points to the question input field.

You can also type your own questions

Could you provide detailed information on the variety of payment methods that are accepted at Emeritus? Do you accept traditional banking services?

03

What can you ask Emeritus AI

Refresh Concepts or Dive Deeper

"What is pre-activation?"
"Explain logistic regression basics."
"How does logistic regression training work?"
"What is the purpose of the activation function in neural networks?"

Ask When You are Stuck: Emeritus AI is your thinking partner

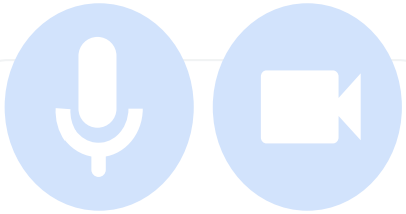

"Why is my code only printing the last graph in a for loop?"
"What should I include in my introduction post?"
"I still don't understand this. Explain this to me like I'm a 10-year-old"
"Why is learning this important?"

Ask about Your Learning Journey

"What's happening tomorrow?"
"What can I expect from the next module on Deep Learning?"
"When is my next assignment due?"
"What is a self-study discussion in a section?"
